

Coordinating Your Healthcare

We have partnered with your physician(s) to offer you a great new program that will help you, your family, and all your doctors better manage your healthcare.

Will the program cost me anything?

The majority of the Chronic Care Management service is covered by **Medicare**, but depending on your plan, you may be responsible for a portion (up to 20%, or about \$8 per month). If you have supplemental coverage, your portion may be reduced or at no cost.

Chronic Care Management
is a great benefit for
most Medicare patients

Schedule with your Chronic Care
Management Coach.

Why Chronic Care Management?

- According to the CDC, 3 in 4 Americans aged 65 and older has multiple chronic conditions (such as high blood pressure, diabetes, and arthritis) that require ongoing medical attention.
- As the number of chronic conditions increases, patients have more doctor visits, take more medications, and face significant out-of-pocket costs.
- About 1 in 10 hospital stays could have been prevented with better management of chronic conditions, according to a report by the Agency of Healthcare Research and Quality.

The Chronic Care Management (CCM) Program is now a Medicare benefit with which you get access to a Health Coach, in addition to your doctor.

- ✓ Medicare covers a full service care coordination program (patient may be responsible for a small portion)
- ✓ Available to patients with 2 or more chronic conditions (expected to last 12 months)
- ✓ Improved communication among all of your health care providers
- ✓ Monthly contact with a health coach to see if you have any questions regarding medications, communicating changes in your healthcare and scheduling appointments
- ✓ Decreased burden for family members involved in your healthcare.

After speaking with your doctor regarding your eligibility, a signed consent is required to start services

The Health Coach is available to assist with the following:

- Ensure that ongoing attention is paid to your medical care needs between visits to your primary care physician
- Establish new care with medical specialists and community resources
- Coordinate your care and health records
- Inform you when it's time to receive preventive services and immunizations
- Help you understand your medications and conditions
- Ensure your doctors and family have easy access to your Care Plan
- Work with your doctor to create a care plan that includes personalized health goals for you
