

Continuum ACO Case Study

Continuum's Integrated Care Solutions Transformed a Challenged ACO for a Major Win

An ACO struggled for its first two years, losing providers and failing to achieve shared savings. Continuum Health helped transform the group—enhancing quality, reducing overall costs of care, and enabling **\$3 million in shared savings** for the ACO.

Reduced Hospital
Admissions by **8%**

Reduced Emergency
Department Visits by **3%**

Reduced Hospital
Readmissions by **13%**

Reduced Skilled Nursing
Facility Admissions by **22%**

Increased primary care
visits by **7%**

Overall, the ACO achieved a **93.45% Quality Metric** (vs. 80.86% in 2015) and generated **4.7% cost-of-care savings** (saved \$582 per member per year), resulting in a **Net Earned Performance Payment of \$3,080,256**.

In addition, the ACO now has a slightly smaller but more closely aligned provider network, and **32% more patients** than in 2013.

This case study is intended to provide an example of how an actual Continuum client has benefited from Continuum's services. Continuum does not claim that the outcome of this particular case study is a typical result, or that it is necessarily representative of all those who will use its services.
