

# In-Home Patient Visits and Medication Management

**Highly targeted, low-cost, in-home visits by pharmacy personnel that deliver improved patient outcomes**

## Our Outcomes

25% lower admissions  
and readmissions

Improved med adherence measures  
(Proportion Days Covered) to 91%  
compared to the national average of 83%

42% increased medication compliance  
in seniors with 7+ meds by using  
compliance packaging

## Our Process

### Inventory

Document all prescription, herbals, vitamins, nutritional supplements, OTC drugs in the home and opportunities to collect data on SDOH

### Reconciliation

Compare medication orders to actual medications filled and being taken in the home

### Education

Educate on risks, compliance, adverse drug events, and drug-drug interactions

### Analytics

Up-to-date medication list distributed to customer and care team, as well as robust analysis on various aspects of the home visit

### Adherence

Track adherence, days on hand, and PDC, based on label instructions and consumption history
