# Meet Today's Speakers

# James Pelletier

## National Director Provider Quality at MRO

20+ years of experience in Healthcare IT, Population Health, Data and Analytics.

- An expert in the field of population health and healthcare technology.
- Experience working with disruptive and innovative healthcare solution companies to measurably improve care management, risk adjustment, patient engagement, and data insights.
- Wealth of experience working with Accountable Care Organizations on a variety of value-based care initiatives to improve patient outcomes and quality of care.

When James is not working, he loves the Maine outdoors, coaching hockey, and spending time with his 2 kids.

## Bhushan Kadu

### Senior Manager, Account Manager at MRO

Bhushan Kadu is a recognized leader in healthcare management and a key architect of ACO success at MRO Corp.

- As Senior Manager – Account Management, he has led one of the first ACO initiatives to successfully report eQMs across heterogeneous EHR and PM systems, bringing together complex data into a unified, actionable format.
- With deep expertise in health information exchange, population health, and value-based care, Bhushan is known for turning data challenges into opportunities for better patient outcomes.

# Poll Question # 1

# Polling Question #1

Are you an ACO with experience submitting eCQMs, MIPS CQMs, or Medicare CQMs?

- A. Submitted successfully in prior years internally
- B. Submitted successfully in prior years with vendor/Qualified Registry
- C. Have not submitted yet but plan to submit ourselves
- D. Have not submitted but plan to work with vendor/Qualified Registry
- E. Unsure

# About MRO

Accelerating Clinical Data Exchange

# Extensive Connectivity Across the Healthcare Ecosystem

Shaped by technology, built on service.

**24K**  
provider  
submissions  
(PY2024)

**23+ YRS**  
accelerating  
clinical data  
exchange

**99%+**  
customer  
retention

**3K**  
dedicated to  
the mission

Our end-to-end solution aligns with your goals to maximize performance... and shared-savings!

**160+**  
EHRs  
Connected

### Practice On-boarding & Support

- Practice sign-up and registration
- Measure set selection
- Ongoing support & troubleshooting at practice level

### Data Collection & Processing

- Manage collection of the EHRs and extraction
- Data transformation
- Load into clinical data repository

### Quality Performance Dashboard & Reporting

- Measure calculations and comparisons
- Various dashboard views for stakeholders
- CMS program submission support

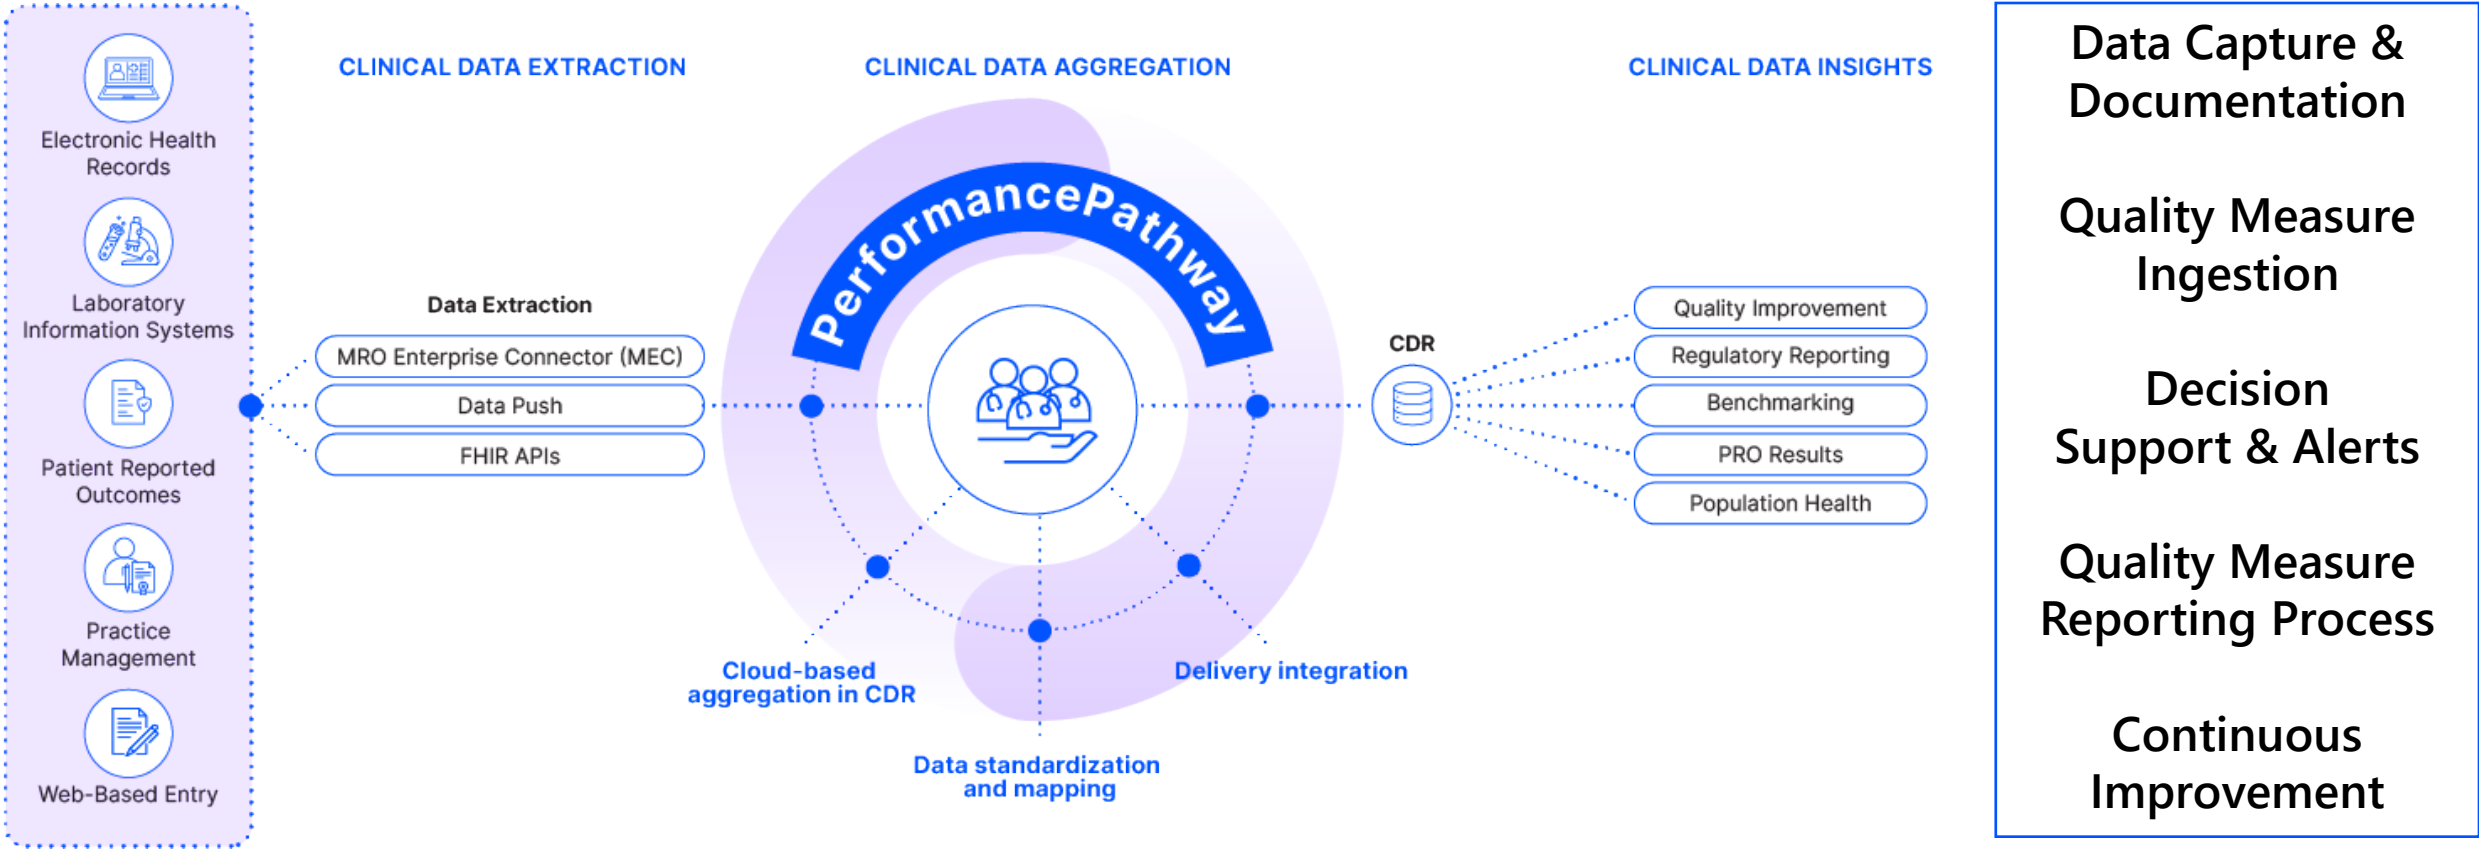

### Population Health Management

- Design and implement care plans to specific patient groups.
- Monitor and manage chronic conditions
- Allocate resources for better care and cost management.

**140**  
Measures including  
eQMs and CQMs

# Understand the EHR Workflow

# 2025's eCQM Landscape: What's at Stake

# PY 2025 Reporting Requirements

**MSSP ACOs must report four specific measures as part of the APP Plus quality measure set via either eCQM, MIPS CQM, or Medicare CQM:**

- Other considerations
  - eCQM/ MIPS CQM – All Patient, All Payer
  - Medicare CQM – Medicare patients only

**1**

**Diabetes: Hemoglobin A1c**  
*(HbA1c) Poor Control*

**2**

**Preventative Care and Screening:** *Depression Screening + Follow-Up Plan*

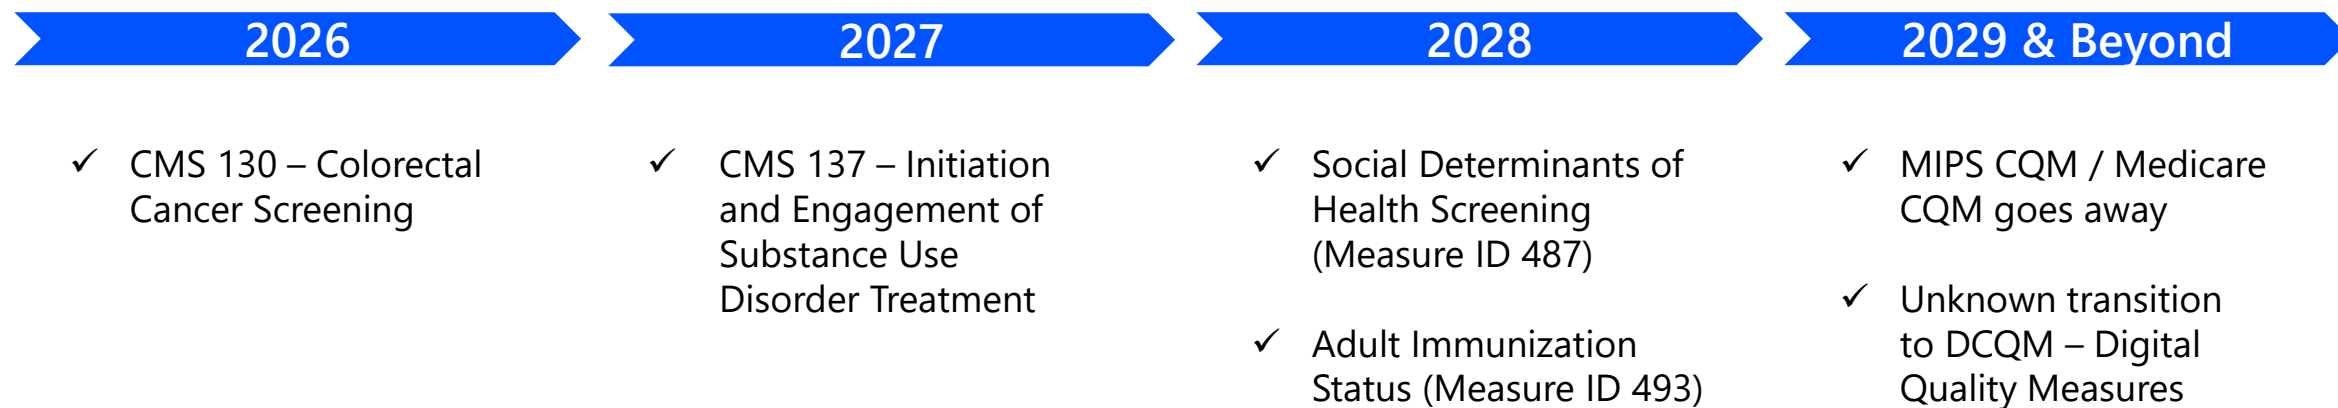

**3**

**Controlling High BP:** *% of patients age 18–85 with diagnosed hypertension whose bp is controlled*

**4**

**Breast Cancer Screening:** *% of women age 50–74 who received a mammogram every 1-2 years.*

# Future Reporting Requirements

# Acquire Comprehensive Data Across All Practices

# Challenges of Multi-EHR Data Extraction

CEHRT version of EHR for all TINs

Unifying clinical data

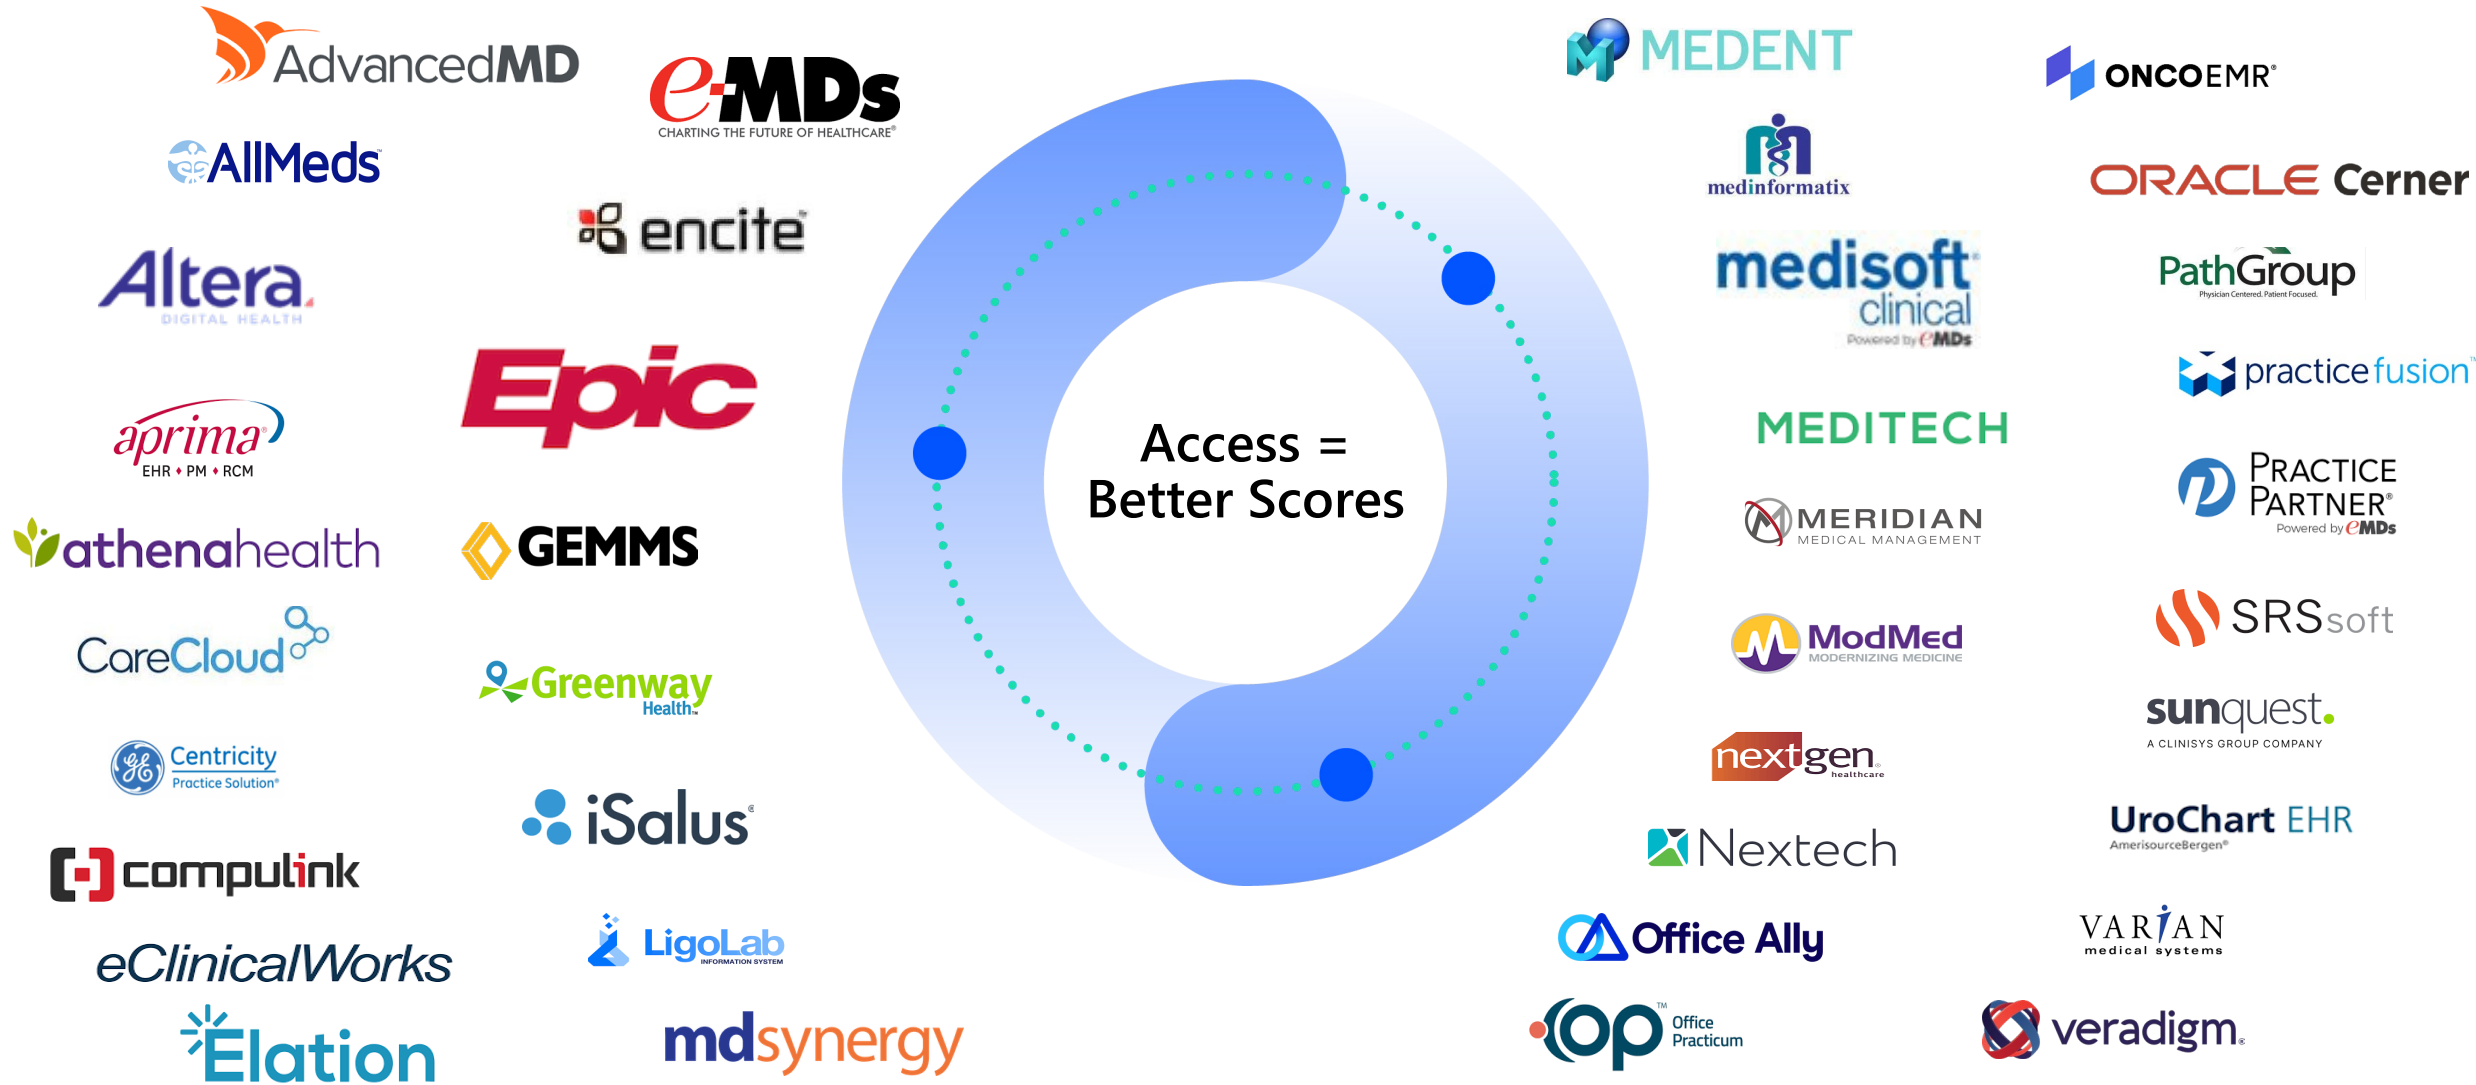

QRDA-1 isn't available or reliable

Data validation

# Interoperability and Data Sharing

# Data Validation & Gap Analysis: Chart review and patient attribution are essential tasks.

Missing Vitals

Tobacco use not recorded

External labs not in Primary EHR

Incomplete/  
inconsistent DX codes

# De-Duplicate and Link Patient Records

# Address duplication using proven methodologies

**Master Patient  
Index (MPI) systems**

**Unique patient  
identifiers**

**Manual review  
processes**

# Continually Monitor ACO Quality Performance

# Performance Monitoring

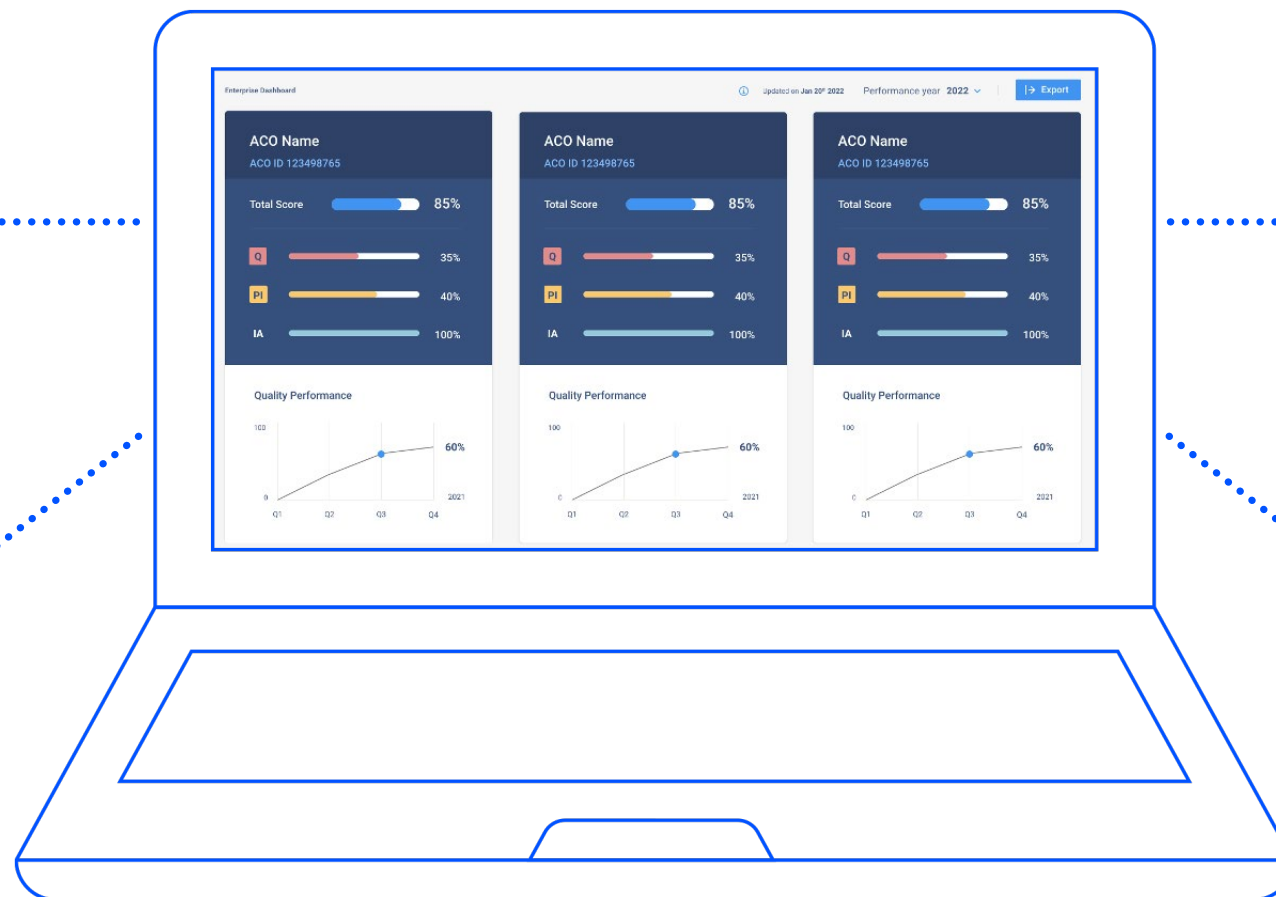

Measure-  
level  
tracking

Time-based  
trending

Provider and  
TIN-level  
analytics

Continuous  
quality  
tracking

## Poll Question # 2

# Polling Question

How many EHRs do you have in your ACO?

- A. 1
- B. 2-5
- C. 5-20
- D. 20+

# Poll Question # 3

# Polling Question

What do you think is your biggest challenge to eCQM/ CQM reporting?

- A. Acquiring EHR data
- B. Validating data gaps
- C. Deduplicating patients
- D. Monitoring performance
- E. Other (put answer in chat)

# Build or Partner for eCQM Reporting

# Key Take Aways

**Accurate Data Drives VBC Success:** Reliable, validated data ensures ACOs can effectively measure and report on eCQM requirements.

**Operational Efficiency Through Automation:** Reduces administrative burdens, minimizes errors, and empowers ACOs with real-time data, leading to better decision-making and financial performance.

**Data Validation and Standardization:** Validated data, ensuring the accuracy of quality reporting and compliance with performance metrics, maximizing shared savings.

**Interoperability for Seamless Care Coordination:** Facilitates smooth data sharing, ensuring timely, actionable insights to improve care coordination and outcomes.

**Centralized Repositories:** Consolidating data into a single source reduces fragmentation, allowing a holistic view of patient care and performance tracking across critical VBC measures.
